

PODS! Quilting Workshop with Betty Busby

Learn all about heat shapeable batting.

In this class, we will explore the basics of using this very useful material by creating raw edged, curved forms.

Supply list:

Sewing machine, and supplies (pins, scissors, thread, rotary cutter & mat etc)

*machine should be set up for quilting, either free motion, or with a walking foot. You will be quilting an approximately 10x20" piece.

1/2 yard of burlap or other coarsely woven material

1 yard of dark colored material for lining the pod, and one for making the seeds inside.

Neutral colored button & carpet thread and sturdy needle

Minimum 1/2 yard Fosshape 300- available from EQuilter.com

A small, handheld steamer such as the Conair Extreme Steam Fabric Steamer from Target is really handy- if this isn't an option, the steam irons in class can be used.
